Project Name	Help Desk Ticket Management System
Maximum Marks	4 Marks

Brainstorming – Idea Generation & Prioritization

Brainstorming is a creative process used to generate multiple ideas and identify the most suitable solution for a given problem. It encourages the exploration of different approaches before selecting the best one based on feasibility, impact, innovation, and implementation.

For this project, several ideas related to improving organizational support services were considered. Each idea was evaluated based on ease of implementation, scalability, automation capability, and user benefits. After careful analysis, the **Help Desk Ticket Management System using ServiceNow** was selected as the most appropriate solution because it automates the ticket management process, improves communication, and provides efficient tracking and reporting features.

Brainstorm & Idea Prioritization

Use this template in your own brainstorming session to generate ideas and select the best solution for our project.

This will help in building a clear and effective system that solves our problem.

-  **30 minutes**
Total Session Time
-  **Individual Project**
Self Ideation
-  **Project Focus**
Help Desk Ticket Management System using ServiceNow
-  **Goal**
Select the most impactful and feasible solution

Before you start

A little preparation helps in a better brainstorming session. Here's what you should do before starting.

 10 minutes

-  **Understand the Context**
Understand the current process of handling IT support requests and identify the pain points.
-  **Define the Goal**
Think about what we want to achieve through the system and the value it will provide.
-  **List Key Needs**
List the must-have features and improvements that can solve the problem effectively.

 **Project Focus**
Help Desk Ticket Management System using ServiceNow

Automate • Track • Communicate • Resolve

1 Define your problem statement

Frame your problem as a clear "How Might We" statement. This will be the focus of your brainstorming.

 5 minutes

 **PROBLEM STATEMENT**

"How might we automate and streamline the process of raising, assigning, tracking, and resolving IT support requests to ensure faster resolution, clear communication, and better visibility for employees and IT support teams?"

Key Rules of Brainstorming

 Stay in topic.	 Encourage wild ideas.
 Defer judgment.	 Listen to yourself.
 Go for quantity.	 Be visual if possible.

Brainstorming Table

Idea	Advantages	Limitations
Employee Leave Management System	Automates leave requests	Limited to HR operations
Asset Management System	Tracks company assets	Does not address support requests
Visitor Management System	Improves visitor tracking	Limited organizational impact
Help Desk Ticket Management System	Automated ticket assignment, notifications, reporting, dashboards	Requires ServiceNow platform

Final Selected Idea

Help Desk Ticket Management System using ServiceNow

Reason for Selection

- Automates the complete ticket lifecycle.
- Reduces manual effort.
- Improves communication between employees and IT support.
- Provides real-time ticket tracking.
- Generates reports and dashboards.
- Supports email notifications for critical tickets.
- Can be easily enhanced with future ServiceNow features.
